Projects

- Study Planner Website - (Link)

  Designed and developed a task management system using **HTML, CSS, JavaScript, and Bootstrap**. The system enables users to create and manage tasks with durations, time, and continuous reminders for daily, weekly, or monthly schedules. It features a **user dashboard** to track progress, integrated skill-testing quizzes, and an intuitive interface for an enhanced user experience.

- Travel and Tourism Website - (Link)

  Created an interactive travel booking website with a **PHP and MySQL backend.** The platform offers users the ability to **book tickets** worldwide, explore tailored travel packages, view destination images, and access Detailed information about tourist spots. Built with **HTML, CSS, and JavaScript,** the website delivers a smooth and user-friendly experience for travel planning.

Achievements

- **C++ Developer intern** at CipherByte Technologies . (July 2024 - Aug 2024)
